SILABUS FULLSTACK JS

Repository: https://github.com/vanbumi/kelas-fullstack-mc

1. Pendahuluan
   1.1. Pengantar
   1.2. Cara Bertanya WAJIB DIBACA.
   1.3. Forum Diskusi
   1.4. Github Repository
   1.5. Panduan Instalasi
   1.6. Apa itu Fullstack

2. Pengenalan HTML
   2.1. Apa itu HTML.
   2.2. Membuat HTML - blog
   2.3. Finishing HTML - blog
   2.4. Test HTML mu: https://forms.gle/sxCnkggm6e6GU8uE9.

3. Pengenalan CSS
   3.1. Apa itu CSS
   3.2. Style dengan CSS.
   3.3. CSS Color
   3.4. CSS Class dan ID
   3.5. CSS Layout
   3.6. CSS layout continue
   3.7. Html-blog finishing #1
   3.8. Html-blog finishing #2
   3.9. Html blog source code: https://github.com/vanbumi/kelas-fullstack-mc/tree/master/Projects/project-html-blogs
   3.10. Test CSS mu: https://forms.gle/8Jm2rPkpRB3NsXJZA

4. Mengenal BootstrapJS
   4.1. Apa itu Bootstrap?
   4.2. Pengenalan Bootstrap

4.3. Project Bootstrap #1

4.4. Project Bootstrap #2

4.5. Project Bootstrap #3

4.6. Project Bootstrap #4

4.7. Project Bootstrap #5

4.8. Project Bootstrap #6

4.9. Project Bootstrap #7 Finish

4.10. Source Project Bootstrap Final: https://github.com/vanbumi/kelas-fullstack-mc/tree/master/Projects/project-bootstrap

5. Version Control GIT

   5.1. Pengenalan Git

   5.2. Cara Upload ke Github.com

   5.3. Cara Daftar ke Github.Com

   5.4. Tugas Push Project Bootstrap anda ke Github.com.

6. Basic JavaScript

   6.1. Pengenalan JavaScript

   6.2. JavaScript Variable

   6.3. JavaScript Operator

   6.4. JavaScript If Else

   6.5. JavaScript Boolean

   6.6. Switch

   6.7. Function #1

   6.8. Function #2

   6.9. Statemen-Expression-Array

   6.10. Object New

   6.11. Menyisipkan Object dan Array

   6.12. Mengakses Object dan Array

   6.13. Create Asign Delete

   6.14. Modifikasi array

   6.15. JavaScript Loops

   6.16. Intro js Loops

   6.17. JavaScript DOM

7. **React Express MongoDB dan NodeJS (REMONDS BACKEND)**

    7.1. Pendahuluan.

    7.2. Overview.

    7.3. App Result

    7.4. Setup-envIronment

    7.5. Setup-mongodb-atlas

    7.6. Setup Express Js

    7.7. Konek ke Database

    7.8. Express Route

    7.9. User Schema

    7.10. Validasi Request Body

    7.11. User registration

    7.12. Implementasi JSON Web Token.

    7.13. Middleware & JWT.

    7.14. Login User

    7.15. Membuat Profile Model

    7.16. Get Current User Profile

    7.17. Create & Update Profile #1

    7.18. Create & Update Profile #2

    7.19. Get all profile dan profile by id.

    7.20. Profiles & Single profile

    7.21. Delete Profile dan User

    7.22. Delete profile dan User

    7.23. Tambah profile experience

    7.24. Delete experience

    7.25. Delete profile experience

    7.26. Tambah dan Delete Education

    7.27. Profile Github

    7.28. Create Post Model

    7.29. Add Post Route

    7.30. GET DELETE Post Route

    7.31. Repository REMONDS App: https://github.com/vanbumi/remonds-app

React Express MongoDB dan NodeJS (REMONDS FRONTEND)

7.32. Themes remonds app: https://github.com/vanbumi/Remonds-app-theme

7.33. Remonds App Theme (Template UI)

7.34. React Setup.

7.35. Organisasi file.

7.36. React Router setup

7.37. Form Register dan useState Hook

7.38. Form Login dan useState Hook

7.39. Membuat Redux Store

7.40. Alert Reducer, Action dan Type

7.41. Alert Component & Action Call

7.42. Auth Reducer & Register Action

7.43. Load User Dan Auth Token

7.44. User Login

7.45. Logout Navbar Link

7.46. Protected Route untuk Dashboard

7.47. Profile Reducer dan getCurrentProfile

7.48. Setup Dashboard

7.49. Create Profile Component

7.50. Membuat Profile Action

7.51. Edit Profile

7.52. Add Education dan Experience

7.53. List Education dan Experience

7.54. Delete Experience dan Education

7.55. Profile Action dan Reducer

7.56. Display Profiles

7.57. Display Single Profile

7.58. ProfileTop dan ProfileAbout

7.59. Profile Experience Education Display

7.60. Display Github Repo

7.61. Post Reducer Action & Initlal Component

7.62. Post Item Component.

7.63. Like dan Unlike

7.64. Delete Post

7.65. Add Post

7.67. Single Post

7.68. Tambah & Delete Comment

7.69. Tambah Comment

7.70. Display Comment Delete

7.71. Instal Heroku

7.72. Persiapan Deploy

7.73. Deploy ke heroku

7.74. Remonds App Done: http://remondsapp.herokuapp.com/
